

**March 30, 2020 - [Executive Order 202.13](#) Authorizes School Districts to Fund Child Care Services**

Education Law § 414(i) provides that a school district's facilities and grounds may be used to provide child care services. However, the statute further provides that "the cost of such care shall not be a school district charge" and must be borne by either (a) the person responsible for the child; (b) the local social services district; or (c) any other public/private voluntary source. This Executive Order now authorizes school districts, through April 15, 2020, to fund the costs for child care services that are held on school grounds.
